Art Unit: 2651

1. Lacombe, Kuehlwein, Leighton, and Block are cited as of interest.
2. Claims 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/12/05.
3. Applicant's election with traverse of claims 1-16 in the reply filed on 4/12/05 is acknowledged. The traversal is on the ground(s) that the inventions are not independent and distinct and that both inventions can be examined without serious burden. This is not found persuasive because MPEP803 supports restriction if the inventions are independent or distinct and the Group II invention requires the search of over five hundred additional patent documents.

The requirement is still deemed proper and is therefore made FINAL.
4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
5. Claims 7, 15 are objected to because of the following informalities: "said third pair of resistors" has no antecedent. Appropriate correction is required.

Art Unit: 2651

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 9, the phrase "through the second transistor" is unclear in meaning. Is this the second transistor of the first or second pair of transistors? Similarly, regarding the phrase "between for switching the second transistor" of claims 6 and 14.
